

HIGH-PERFORMANCE MEMORY FOR DATA-DRIVEN SYSTEMS

Leverage professional-grade memory parts with decades of experience supporting OEMs with technical expertise. PNY provides scalable **GPU**, **SSD**, and **DRAM solutions** that deliver strong execution at competitive prices. Reduce deployment risk and improve system performance with a globally recognized brand trusted across enterprise and embedded markets.

Optimize cost

Achieve competitive pricing across GPUs, SSDs, and DRAM without compromising reliability.

Lifecycle integrity

Receive ongoing technical support throughout your product lifecycle, across industries.

Accelerate deployment

Reduce lead times through global distribution and robust inventory positioning.

Next-gen design

Power high-performance architectures with parts built for compute-intensive environments.

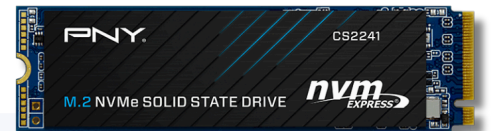

Secure continuity

Access stock allocation programs and structured supply planning for large-scale deployments.

Strong performance

Pair professional GPUs with validated SSD and DRAM configurations for various architectures.

Wide product range:

NVIDIA Professional Graphics GPUs
 NVIDIA GeForce GPUs
 NVIDIA Data Center GPUs
 Enterprise + industrial SSDs
 DRAM modules

Key industries:

Aerospace + defense
 Healthcare
 Manufacturing
 HPC + AI
 Agriculture
 Enterprise IT + data centers

Reliable second sourcing alternatives to:

ASUS	Kingston	Micron
Colorful	Samsung	Western Digital

Sourcing what keeps you moving

Focus products

250GB / 500GB SSD NVMe and SATA
 RAM 8GB / 16GB DDR5 Gen 4 and Gen 5

Source smarter with PNY's global distribution network and structured supply-chain management systems. Full **traceability** and **documentation** are available to support high-reliability industries with relevant documentation upon request. Long-term programs are no match for PNY's wide-ranging portfolio built for stable configurations and lifecycle support.
